Presentation slides are now available for many of the KLIC presentations delivered during the 2009 INFORMS Annual Meeting. You may access these slides by selecting KLIC Sessions Archive and then selecting INFORMS 2009. To download available slides, click on the presentation title, or on the words "download presentation" located below the abstract.

These KLIC sessions were of high quality, and a large number were organized by individual scholars, with the remainder organized by KLIC volunteers. During 2010, an even greater share of the KLIC sessions offered in the INFORMS Annual Meeting Technology Management Section Program will be organized by individual scholars. This is an exciting trend that may lead us into a new era during which KLIC will thrive in INFORMS TMS with little or no organizing effort by KLIC volunteers. We will continue posting KLIC program information and session abstracts on www.klicnet.org, so if you have KLIC session information from any conference to post please contact dmoore@klicnet.org.
