If you desire to add a link to the web site of a KLIC scholar, practitioner, professional organization or journal publishing topics of relevance to the KLIC community, please register your username and password (click on "register" in the "Login Form" area on the left of the KLICNET home page). Once your username and password have been registered you will receive an email containing a link, which you must select in order to activate your registration. Within 48 hours of registering the Klicnet Administrator will change your status so that you also may submit news items for posting on the front page of www.klicnet.org. A klicnet administrator will review each submission and may request edits prior to publishing the submission on the front page of www.klicnet.org. You may also participate in the various message boards available through www.klicnet.org. You will need to register yourself on the message board system in order to reply to posts. If you would like to be able to originate new topics for discussion please send email to administrator@klicnet.org requesting this privilege and your user status will be updated. Thank you!
